

Rules: Easy Deployment or Vercel or Github pages
UNLESS its not possible then present
me my options

Keep a daily List of coins and check for New ones

check 6AM → Create list

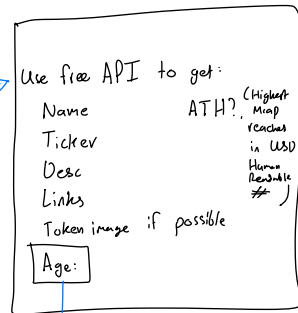

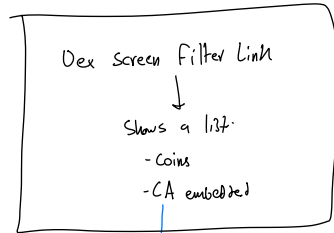

if I approve some
a delete some

Allow a filter list to show
deleted cards to UNDO delete
& one for kept to undo keep

when the Next "Check" comes

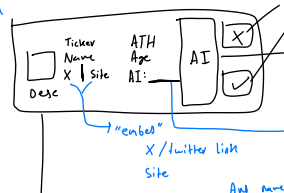

I want only New cards

to be added and cards deleted Don't
Just reappear.

Use to order results
Vertically
Sort by youngest list
Oldest last

In card format

when these card clicked the state should be saved for that CA

Button to have
Claude Haiken (a cheap model)
Analyze to say keep or Delete

If Sounds
really keep
any pure
"Memes"

Simple Design + include features we described
